

Committee Meeting:
Standing Committee on Safety Performance and Analysis
January 8, 2025

Review of the effectiveness of city-wide 30 km/h speed limit in Europe

George Yannis
NTUA Professor

Together with: Eva Michelaraki, Research Associate

Department of Transportation Planning and Engineering
National Technical University of Athens

Objectives

Two published literature reviews:

- Assessment of changes **before and after** the implementation of city-wide 30 km/h speed limits in Europe (meta-analyses of 70 studies from 17 cities)

Yannis, G., & Michelaraki, E. (2024). Review of City-Wide 30 km/h Speed Limit Benefits in Europe Sustainability, 16(11), 4382

- Assessment of the effectiveness of 30 km/h speed limit through **simulation studies** (meta-analyses of 60 studies)

Yannis, G., & Michelaraki, E. (2024). Effectiveness of 30 km/h speed limit - A literature review. Journal of Safety Research, Vol. 92, November 2024`

Scientific Evidence on 30km/h City-wide Schemes

Cities with 30 km/h Speed Limit

A/A	City	Implementation Started
40	Amsterdam	December 2023
39	Wales	September 2023
38	Bologna	July 2023
37	Florence	November 2022
36	Copenhagen	June 2022
35	Lyon	March 2022
34	Den Haag	December 2021
33	Zurich	December 2021
32	Toulouse	November 2021
31	Vienna	September 2021
30	Paris	August 2021
29	Montpellier	August 2021
28	Münster	July 2021
27	Valencia	May 2021
26	Leuven	April 2021
25	Brussels	January 2021
24	Nantes	August 2020
23	Glasgow	January 2020
22	Antwerp	January 2020
21	Barcelona	December 2019

A/A	City	Implementation Started
20	Lille	August 2019
19	Helsinki	May 2019
18	Madrid	September 2018
17	Bilbao	June 2018
16	Strasbourg	February 2017
15	Dublin	January 2017
14	Berlin	January 2017
13	Edinburgh	July 2016
12	London	June 2016
11	Grenoble	January 2016
10	Ljubljana	September 2015
9	Luxembourg	August 2015
8	Ghent	April 2015
7	Bristol	2015
6	Munich	2011
5	Brighton	2010
4	Hove	2010
3	Warrington	July 2005
2	Stockholm	2004
1	Graz	September 1992

30km/h Speed Limit in Cities (1/2)

Yannis, G., & Michelaraki, E. (2024). Review of City-Wide 30 km/h Speed Limit Benefits in Europe Sustainability, 16(11), 4382

City-wide 30km/h speed limits led to **average reduction** in:
(meta-analyses of 70 studies from 17 cities)

- Fatalities by **37%**
- Serious injuries by **38%**
- Road crashes by **23%**
- Emissions by **18%**
- Noise by **2.5 db**
- Fuel consumption by **7%**
- Traffic congestion by **2%**

30km/h Speed Limit in Cities (2/2)

Yannis, G., & Michelaraki, E. (2024). Review of City-Wide 30 km/h Speed Limit Benefits in Europe Sustainability, 16(11), 4382

Fatalities:

- 63% and 55% reduction in Bristol and Brussels

Serious injuries:

- 72% and 50% reduction in Münster and Grenoble

Road crashes:

- 46% and 40% reduction in London and Paris

Emissions:

- 29% and 25% reduction in Berlin and Graz

Noise:

- 3 db reduction in Paris and Berlin

Energy:

- 12% and 10% reduction in Münster and Brussels

Traffic congestion:

- 9% and 2% reduction in Grenoble and Bilbao

City	Safety			Emissions		Energy	Traffic
	Crashes	Fatalities	Injuries	CO ₂ , NO _x , PM	Noise	Fuel	Congestion
Bologna	-38%	-33%	-10%	-23%			-3%
Zurich	-16%	-25%	-20%		-1.7 dB		
Paris	-40%		-25%		-3 dB		
Münster			-72%	↓	↓	-12%	
Brussels	-10%	-55%	-37%		-2.5 dB	-10%	
Glasgow		-31%					
Helsinki	-9%		-42%				
Bilbao	-28%			-19%			-2%
Berlin	-10%			-29%	-3 dB		
London	-46%	-25%	-25%	-10%			
Grenoble	↓	↓	-50%				-9%
Edinburgh	-38%	-23%	-33%	-8%			-2.4%
Bristol		-63%					
Brighton			-45%				
Hove			-45%				
Warrington			-43%				
Graz	-12%		-20%	-25%	-2.5 dB		

* grey colour indicates that the impact of the implementation of 30 km/h in this city has not been examined yet
 ** the symbol ↓ indicates that the quantitative effect of this measure has not been provided; only qualitative impact is given
 *** these reductions refer to a comparison period before and after the implementation of 30 km/h speed limits which is not the same among all cities examined

Effectiveness of 30 km/h Speed Limit

Yannis, G., & Michelaraki, E. (2024). Effectiveness of 30 km/h speed limit – A literature review. Journal of Safety Research, Vol. 92, November 2024

Environment

- reduce air pollution
- reduce car dependency

Energy

- reduce fuel consumption
- promote smoother eco-driving

Traffic flow

- reduce traffic volumes
- reduce congestion

Road safety

- decrease average travel speed
- decrease conflicts with VRUs

Sustainability

- increase Public Transport use
- increase pedestrian, cyclists and e-scooter active mobility

*Setting a speed limit of 30 km/h where people and traffic mix, make streets
safer, healthier, greener and more liveable*

Cost Benefit Analysis Example

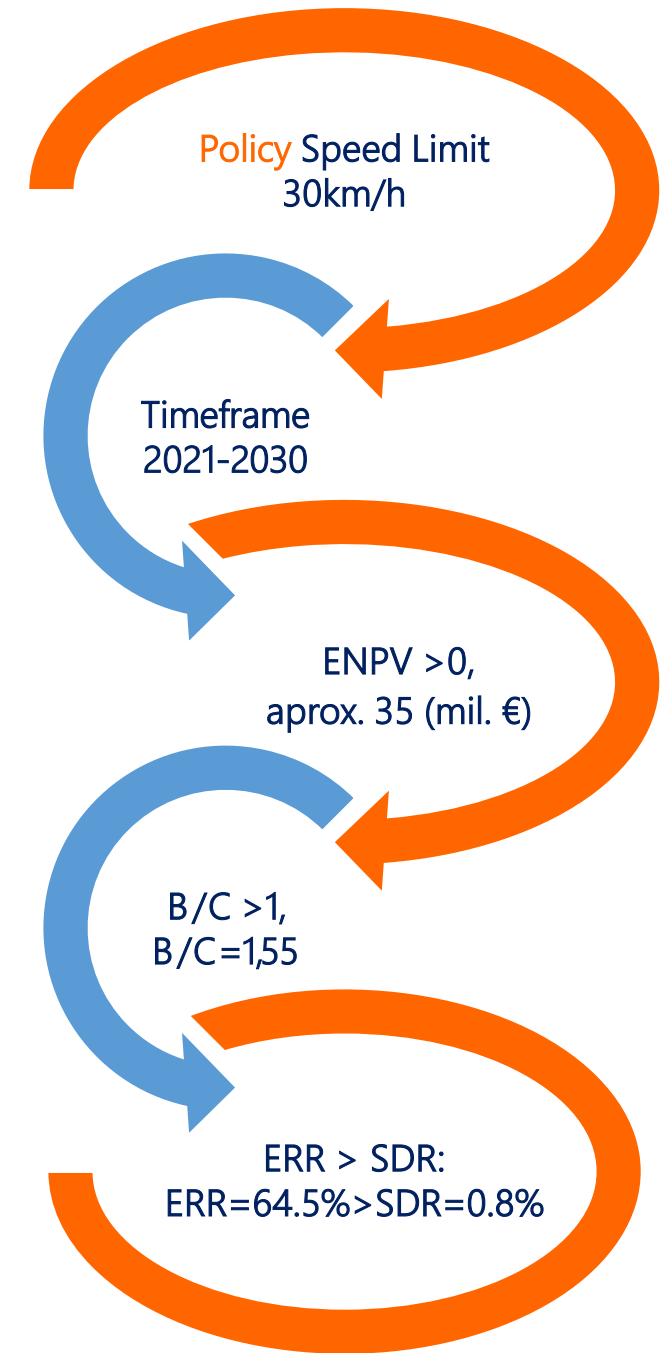

Cost Benefit Analysis Results – Athens

Roussou, S., Petraki, V., Deliali, K., Kontaxi, A. & Yannis, G. (2024). Cost benefit analysis of reducing speed limits in Athens to 30 Km/h. Case Studies on Transport Policy, 101289, October 2024

A Cost Benefit Analysis for the City of Athens was implemented till the year 2030, by including all the **Costs** (Implementation and Operational) and all the **Benefits** (Road Crashes, Fuel Consumption, Emissions) which concludes to the following **results**:

- The most important economic benefit arises due to the improvement of **road safety** through the reduction of fatalities on road crashes:
 - ✓ Expected Net Present Value (ENPV) > €35 million
 - ✓ Benefit-Cost Ratio (B/C) = 1,55
 - ✓ Economic Rate of Return (ERR) = 64.5%
 - ✓ Social Discount Rate (SDR) = 0.8%
- All the examined policies present a **positive ENPV** and an ERR higher than the SDR, indicating their feasibility over time

Benefits from Countrywide New Speed Limits (New National Law expected for next month)

It is estimated that city-wide 30 km/h speed limits on the road network of all cities in Greece (with the exception of major axes) will save lives annually:

- 104 **fatalities** (out of 635 in all of Greece)
- 123 **seriously injured** (out of 636 in all of Greece)
- 783 **slightly injured** (out of 12,533 in all of Greece)

Conclusion

30km/h
Speed Limit for
Safer, Healthier and
Greener Cities

City-wide 30km/h speed limits: the road safety catalyser

The since-long waited **single road safety measure**
with such a **significant benefit** at such a low cost

Such a **high societal impact**
for such a small change in our habits

More than a simple new traffic rule:
a catalyser for a new road safety culture

What about outside Europe?

Lessons for Global Application:

- City-wide 30km/h speed limits are very appropriate for European cities, as most of them are **densely populated areas**, with significant traffic of pedestrians, cyclists, e-scooters and motorcyclists in need of protection from cars' high speeds
- Outside Europe, 30km/h speed limits should be beneficial for the densely populated areas with high presence of **Vulnerable Road Users**, but not easily applicable for not densely populated areas with low presence of pedestrians, cyclists, e-scooters and motorcyclists

Accompanying Measures

- Public consultation and **awareness campaigns**
- **Public transport** and active mobility promotion
- Traffic **calming** measures
- **Intelligent transportation** systems
- **Monitoring** and evaluation
- **Enforcement** and police cooperation

30 Marathons Campaign

- In order to make scientists' voices louder, I engaged in a global campaign of running **30 Marathons in 30 months in order to actively promote the adoption of city-wide 30 km/h speed limit** in as many cities as possible worldwide
- This campaign was concluded in November 2024 in Athens (all Marathons in under 4 hours) with a **particularly significant global impact**

George runs 30 Marathons in 30 Months
for 30km/h speed limit in all cities

Zagori - Jul 2022

Helsinki - Aug 2022

Antwerp - Sep 2022

London - Oct 2022

Athens - Nov 2022

Valencia - Dec 2022

Malta - Feb 2023

Rome - Mar 2023

Paris - Apr 2023

Belgrade - Apr 2023

Copenhagen - May 2023

Stockholm - Jun 2023

George - 30 Marathons - 30 Months

Apeldoorn - Jul 2023

Tallinn - Sep 2023

Brussels - Oct 2023

Lyon - Oct 2023

Athens - Nov 2023

Florence - Nov 2023

Nicosia - Dec 2023

Dubai - Jan 2024

Sevilla - Feb 2024

Barcelona - Mar 2024

Paris - Apr 2024

Zurich - Apr 2024

Utrecht - May 2024

Torhout - Jun 2024

Paris - Aug 2024

Warsaw - Sep 2024

Munich - Oct 2024

Athens - Nov 2024

30

Campaign Social Impact

*An Integrated Communication Policy
with Strong Global Impact*

- **26 cities** with Marathon finish
- **3 papers** in scientific journals
- **20 presentations** in conferences/webinars
- **16 interviews** in the electronic media
- **10 newspaper/magazine** articles
- **40 social media** posts
- **48 republished posts** from scientific organisations and institutions (with 80.000+ post impressions)
- **400.000+ pageviews** per year
- **100.000+ global audience** at social media
- **10 International Organisations** Allied

Committee Meeting:
Standing Committee on Safety Performance and Analysis
January 8, 2025

Review of the effectiveness of city-wide 30 km/h speed limit in Europe

George Yannis
NTUA Professor

Together with: Eva Michelaraki, Research Associate

Department of Transportation Planning and Engineering
National Technical University of Athens
